

Tunnel's now open!

On Thursday July 30th, Toronto Ports Authority officially opened the pedestrian tunnel connecting the Toronto Mainland to Toronto City Airport. Now you can step off or on your Porter plane even faster with the moving sidewalks that let you zip through the tunnel in about 6 minutes. Once arriving on the island side, the atrium will greet you with a picturesque view of the skyline. Of course, the ferry ride is still available if you prefer the scenic route.

Some interesting facts about the tunnel:

- 100 feet underground
- 853 feet across
- 4 moving sidewalks
- 6 elevator banks
- 100% powered by green energy
