

How to Create a Product Page

Step 1

From the admin section of your site, go to Content icon. Click the **Create Content** button on the right side of the page

Select "Product" from the dropdown menu on the prompt.

Add the title of your product. Add a Cover Photo (1024 px wide) Click the "Create" button

Step 2

In the editor, you can add all your tour information, your itinerary, and as many images as you want.

The fields below the editor are optional - you can add the location of your tour (recommended), and pricing.

On the right side, you can choose to publish your product now, or save it as a draft to keep working on it and publish it later.

You can also add any relevant tags that may be required for your tour to show up on your site.
