Radisson Hotel Manchester City Centre, A Verified Net Zero Hotel

Pioneering Sustainable Hospitality

Verified Net Zero is not a dream - it's happening now. We are bringing the future forward with Verified Net Zero Hotels, proving that bold, industry leading sustainability is possible.

Sustainability isn’t just the right thing to do - it’s a powerful business advantage. Guests are choosing greener stays, stakeholders are backing future-ready properties, and regulators are raising the bar.

By choosing Radisson Hotel Group’s Verified Net Zero Hotels, you’re making a responsible travel choice that minimizes the carbon footprint of your stay across all emission types, right across food & beverage and the entire guest experience, and contributes to making a zero impact on your companies’ emissions from hotels.

Join us in leading the change toward a net zero future. All you have to do is take the first step.

VERIFIED NET ZERO

A Unique Approach on the Three GHG[1] Emissions Scopes

Energy emissions: Scope 1 & 2 (Eliminate)

- Full hotel electrification
- 100% Renewable Energy

Operational emissions: Scope 3 (Significantly Reduce)

- F&B, Disposables, Amenities & Printing
- Outsourced Laundry
- Waste
- Employee commuting
- Business travel

Carbon removals via Nature Based Solutions

Lowest possible remaining emissions are offset through nature-based carbon removals, focused on long-term storage and high-quality local carbon credits.

What is a Verified Net Zero hotel?

A Verified Net Zero Hotel eliminates carbon emissions from energy sources (Scope 1 & 2) and significantly reduces its operational footprint (Scope 3). It's a rigorous framework built on an internationally aligned Net Zero methodology for Hotels and is independently verified to ensure real, lasting impact.

Net Zero Methodology for Hotels

VERIFIED NET ZERO

1: Greenhouse Gas Emissions

What is a Verified Net Zero hotel?

A Verified Net Zero hotel offers three main unique elements in the guest experience

100% Renewable Energy

Verified Net Zero hotels operate on 100% renewable energy - either through full electrification or by purchasing renewable heating/cooling (from sources like city waste treatment or data centers). Energy use is minimized, and all purchases are backed by certificates confirming renewable origin.

Low-Carbon Menus

Developed with our partner Klimato, our in-room dining, restaurant, and Meetings & Events menus feature curated, low-impact recipes that cut emissions by up to 40% per dish. Clear A–E labels indicate each dish's carbon footprint, helping guests make informed choices without compromising on taste.

Minimal waste hotel

Verified Net Zero hotels achieve minimal waste to landfill and significantly reduce waste through smart systems such as automatic food waste tracking, Too Good To Go partnership, coffee pod and water bottle recycling, in-room recycling bins, and waste audits. We also minimize paper use with the Stay app, offer plastic-free dry amenities and bulk bathroom products 100% recycled with Clean the World.

VERIFIED NET ZERO

Verified Net Zero Hotels

With the launch of two Verified Net Zero Hotels, Radisson Hotel Group is setting the gold standard for sustainable hospitality in the industry.

VERIFIED NET ZERO

Enjoy net zero stays, quality and comfort at Verified Net Zero Hotels

85%

of travelers say that more sustainable travel is important, or very important to them[1]

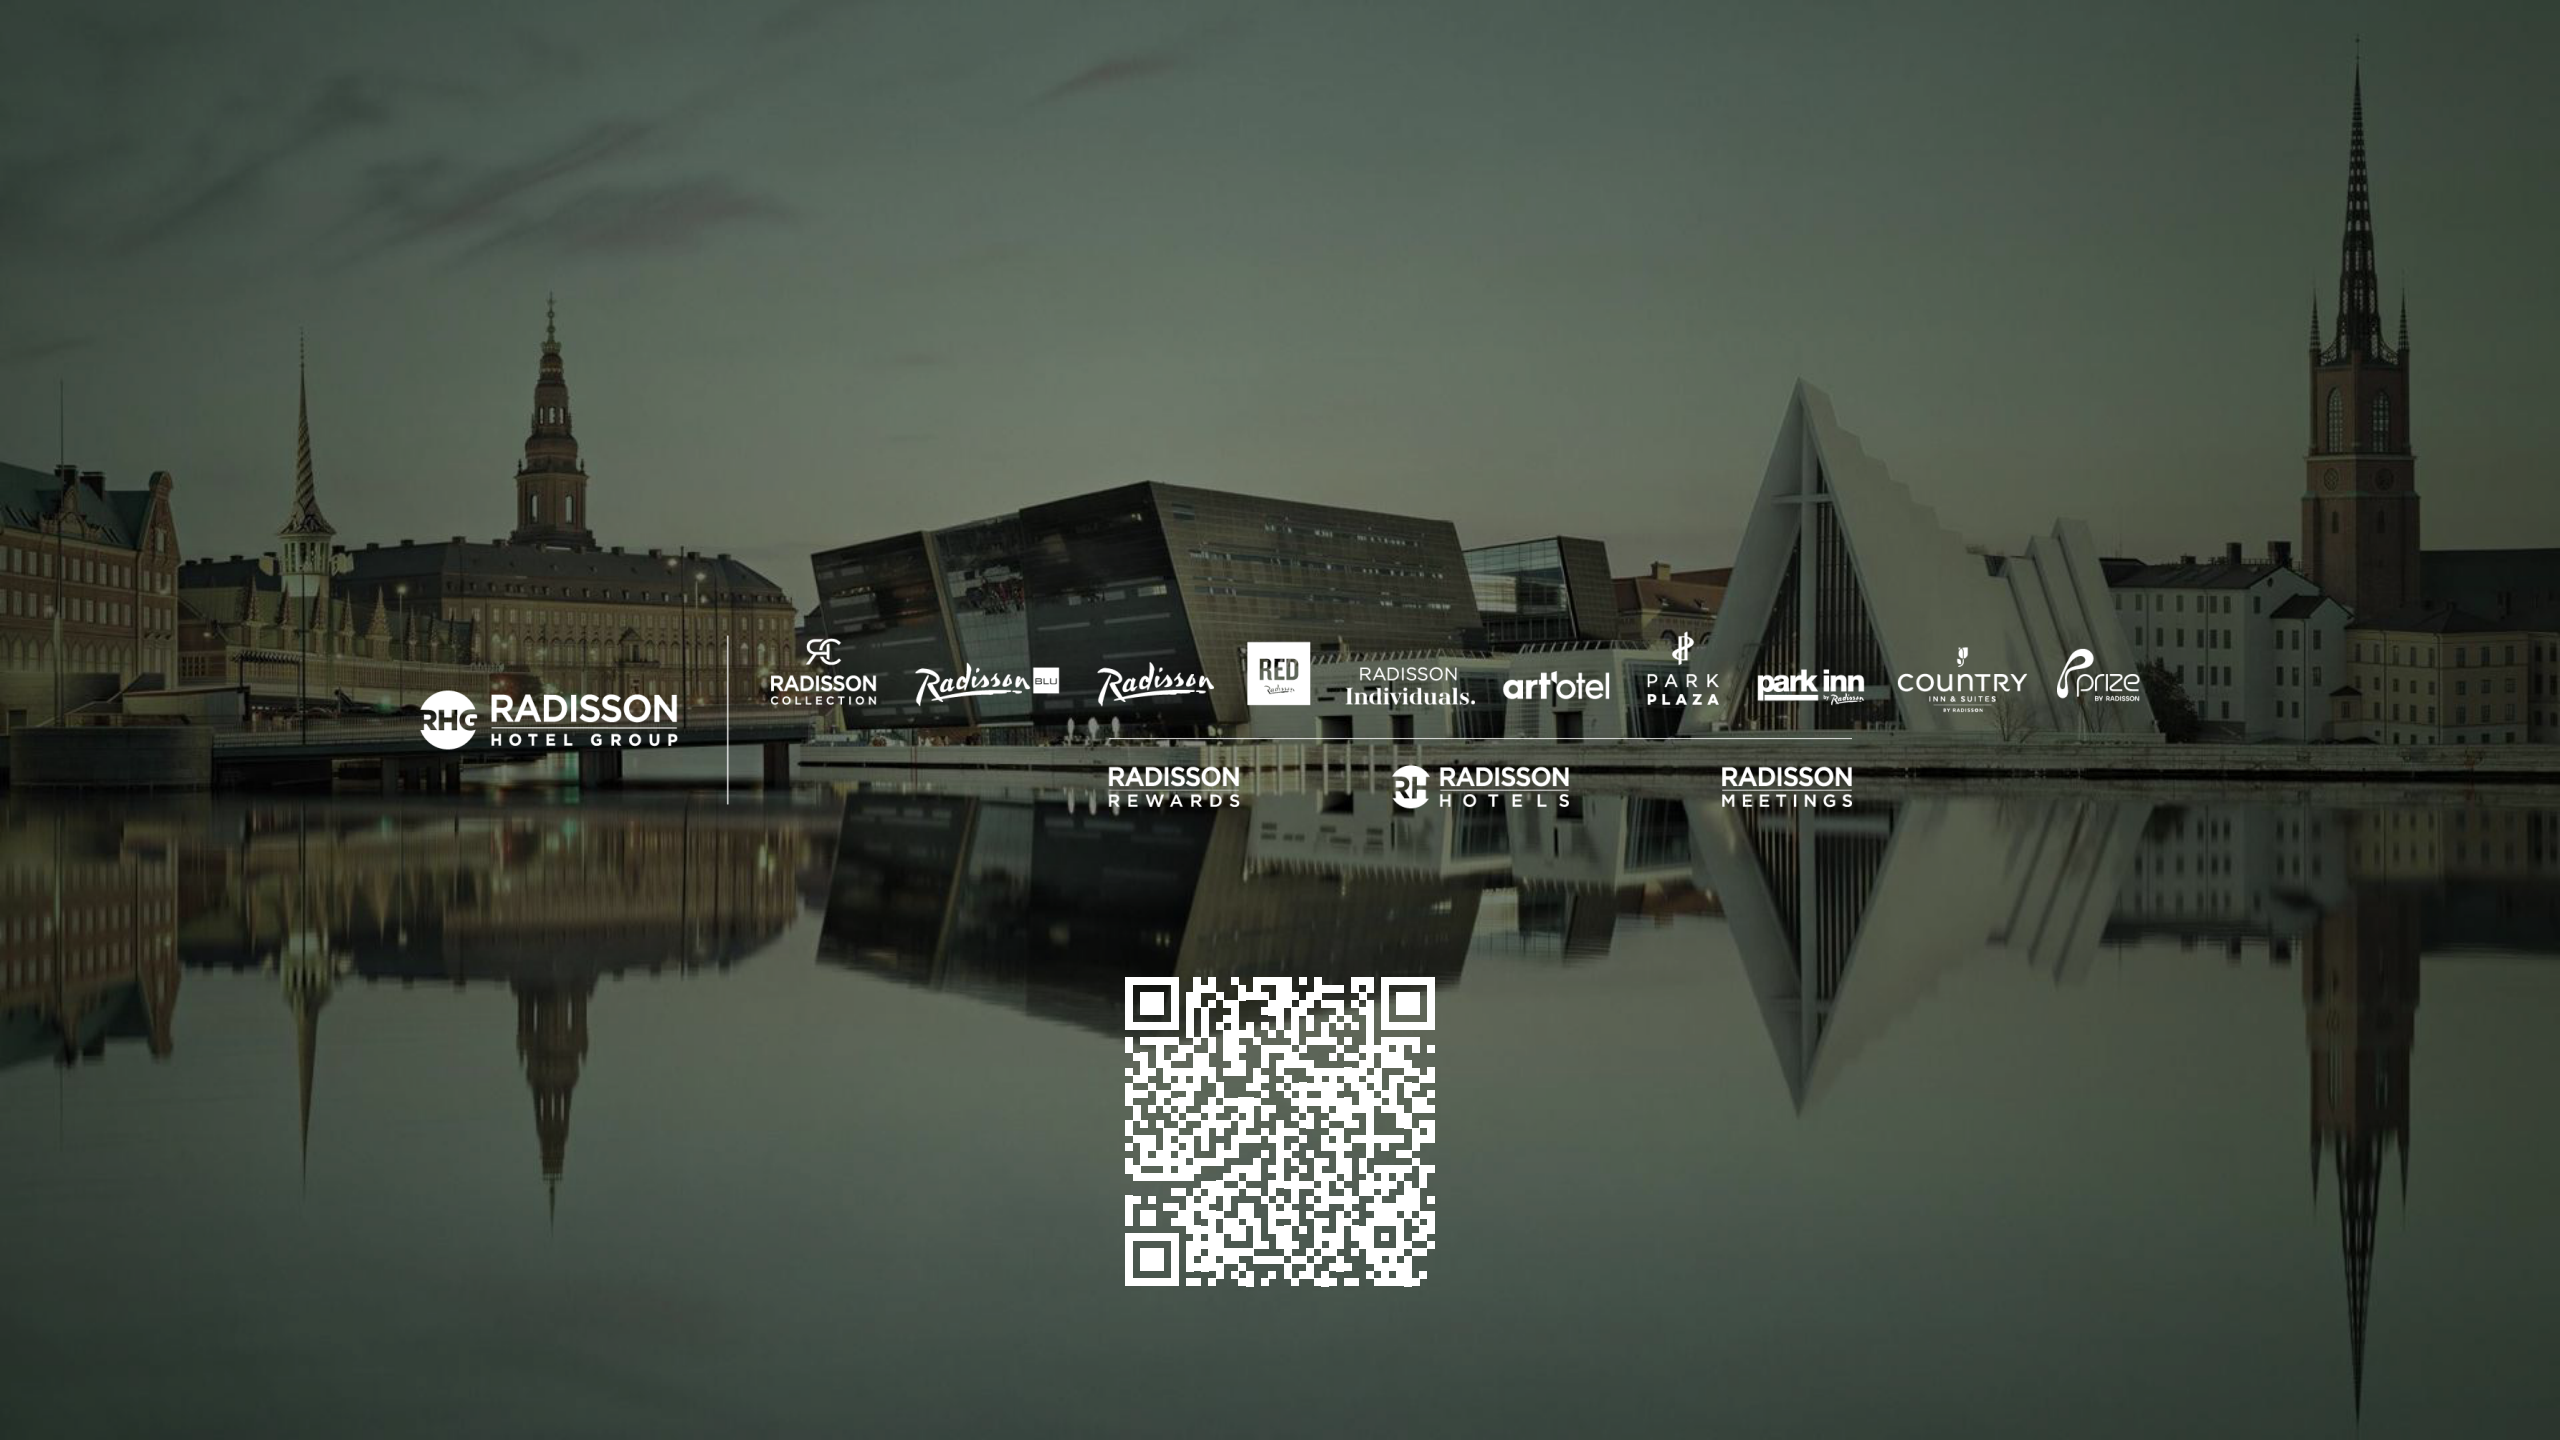

Guests want to book responsible travel. Verified Net Zero hotels take a 360° approach to carbon emission reductions right across emission scopes 1, 2 and 3. Remaining emissions are offset with certificates from carbon removal.

Guests experience innovation at a Verified Net Zero hotel, with easy to choose delicious Low Carbon menus and buffets, with an easy to use e-concierge app for a personalized stay, and with public transportation right at the hotel's doorstep.

The emission-free stay at a Verified Net Zero hotel helps to lower your companies' scope 3 carbon footprint from business travel, lodging, meetings and events.
